

Welcome

Our Mission

Beattie Family Dental is committed to providing you and your family with the highest quality dental care with compassion and skill, exceeding expectations through the use of the latest dental technology.

We Emphasize Routine Dental Care

We share the desire of all our patients to minimize the need for extensive dental treatment. This can only be done by regular examinations that detect dental disease before it becomes extensive. At the conclusion of your treatment, you will be placed on our Preventive Recall Program, which requests you to return at a specified time for an examination. The goal of this program is to maintain your attractive appearance, provide good dental comfort and health, as well as prevent future disease.

Protecting Your Family

Beattie Family Dental uses a variety of infection control practices for your family's protection. All instruments used in patient care are sterilized and individually wrapped for your protection. These include gloves, masks, eye shields, and protective clothing. Our staff implements the latest OSHA standards and recommendations of the American Dental Association.
